PRESS RELEASE

THE ASPRI CLIP-ON REVERB HAS BEEN SELECTED FOR THE OFFICIAL 2015 MTV VIDEO MUSIC AWARDS' CELEBRITY GIFT BAGS.

MONTREAL, CANADA: Aspri Creative Acoustics Inc. is very proud to announce that the Aspri Clip-On Reverb is among the selected list of products that will be included in the Official 2015 MTV Video Music Awards' celebrity gift bags. The 2015 MTV VMA will be hosted by Miley Cyrus and will air this coming Sunday, August 30th at 9 PM EST.

The Aspri Clip-On Reverb is the only totally "unplugged" (non-electric) spring reverb system for the acoustic guitar in the world. Unlike all other processed reverb systems on the market, which sound too calculated and cold, the Aspri uses exclusively the "un-processed" and unaltered guitar's personal resonance and tone to enhance its sound naturally while coming straight out of the sound hole of the guitar. Also, given its easy and quick "clip-on" attachment system, the Aspri is completely guitar friendly and does not require any alteration or modification to the guitar. Moreover, if the guitar has a pickup/mic system built-in or if the guitar is mic externally, the Aspri Clip-On Reverb becomes perfectly audible over any amplification you use.

We, at Aspri Creative Acoustics, are excited to broadcast and showcase our product to today's best artists at the MTV Video Music Awards.
